## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to plural patentably distinct species of the claimed invention. There are multiple groups of species and sub species claimed.

Species 1 – the recording apparatus.

Sub species 1A – Fig. 3.

Sub species 1B – Fig. 23.

Species 2 – the reproducing apparatus.

Sub species 2A – Fig. 21.

Sub species 2B – Fig. 25.

Species 3 – the input transport stream.

Sub species 3A – Fig. 15.

Sub species 3B – Fig. 20.

Species 4 – the transport stream after re-encoding.

Sub species 4A – Fig. 16.

Sub species 4B – Fig. 19.

Applicant is required under 35 U.S.C. 121 to: elect one sub species from each of species 1, 2, 3, and 4, respectively, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently no claims appear to be generic. An example of an election, which complies with this requirement, could be sub species 1A, 2B, 3A, and 4A. Applicant is advised that a reply to this requirement must include an identification of the sub species that are elected consonant

Art Unit: \*\*\*

with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species and sub species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species or sub species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species or sub species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HELEN SHIBRU whose telephone number is (571) 272-7329. The examiner can normally be reached on M-F, 8:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAMES J. GROODY can be reached on (571) 272-7950. The fax phone
